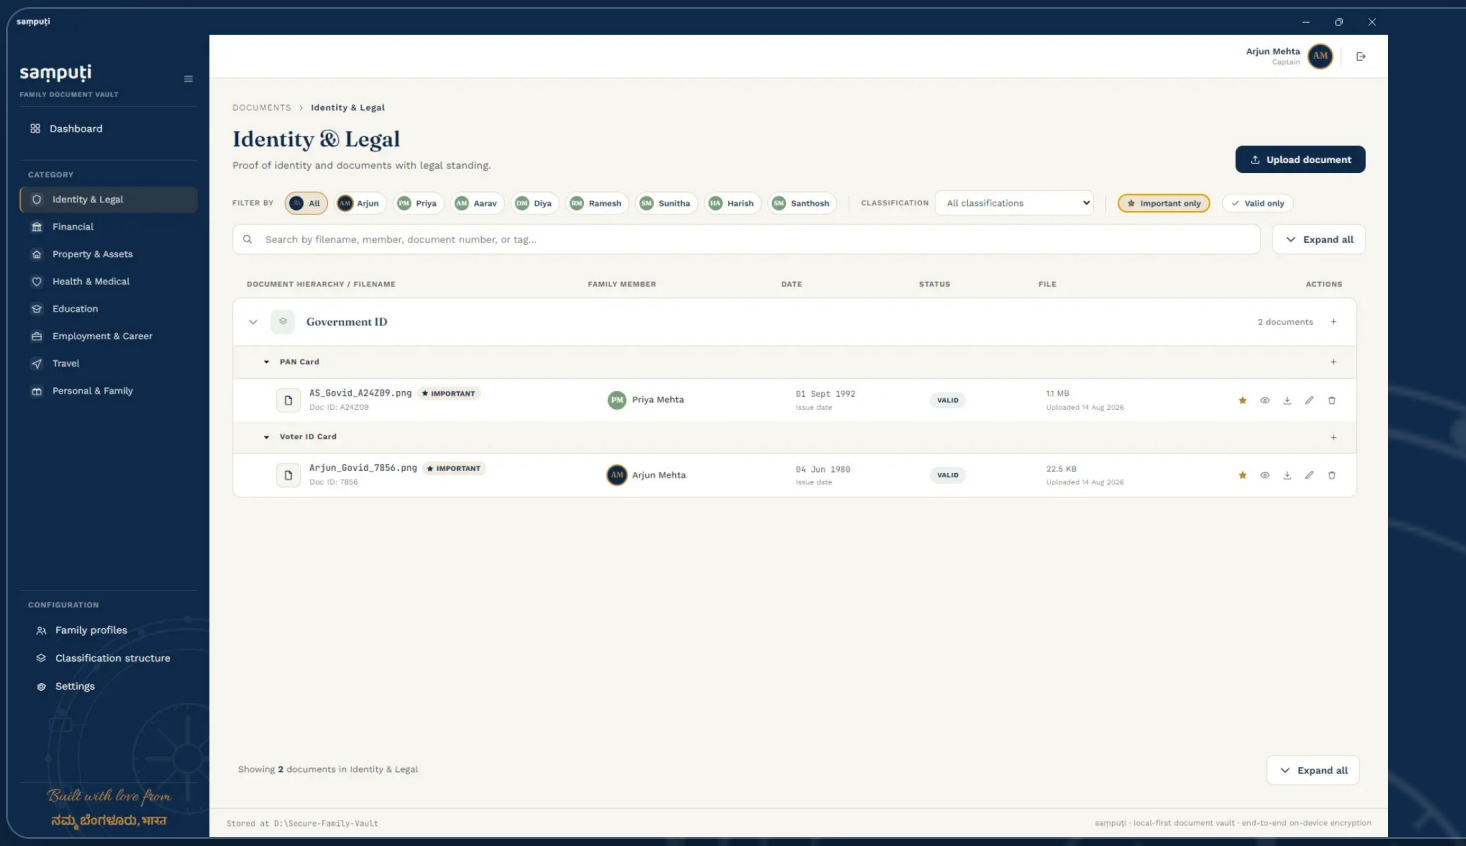
saṃpuṭi

A FAMILY DOCUMENT VAULT · BY SAMPUTI LABS

BUILT FOR THE WHOLE FAMILY

Every vital document, one family, *one vault.*

Identity cards, certificates, insurance policies, property papers — saṃpuṭi keeps every document your family owns organized, searchable and safe, stored on your own device.



Local-first, always · Organized your way · Free to get started

सम्पुटी

सम्पुटी

Saṃpuṭa — a cover, lid or capsule. In traditional practice, the act of sealing something precious with care: to protect it, and to hold its power intact.

Not just storage — a seal around what your family can't afford to lose.

THE KEY DIFFERENCE

Not a cloud drive. *A family vault.*

Generic cloud storage was built for files, not families. saṃpuṭi is built around how households actually keep their paperwork — who owns what, who may see it, and how it should be organized.

Local-first, always

Documents live on your own device, not a third-party server. No subscription just to open your own papers.

Built for real families

Spouse, children, parents, in-laws — each with their own profile, login and access level.

Purpose-built organization

Categories designed around identity, legal, health, finance and property documents — not generic folders.

YOUR DOCUMENTS, YOUR RULES

Privacy that doesn't need a policy page.

No cloud, no exposure

Nothing leaves your device unless you choose to move it. Cloud sync is a choice, not a mandate.

Access, by role

Captain, Navigator or Explorer — every member sees only what they're meant to.

You choose where it lives

Pick the folder and drive — internal, external, wherever you trust most.

Optional AES-256 encryption

Vault-wide master password

Everything a family's paperwork needs.

From the first Aadhaar card to the last property deed — built around how documents actually pile up over a lifetime.

feature areas	individual features	access levels	optional encryption

Family profiles & roles

- A profile and photo for every member
- Captain, Navigator or Explorer access
- Everyone signs in with their own login

Your own hierarchy

- Category → Classification → Sub-class
- Ready-made starter template
- Folders on disk mirror the structure

Smart uploads

- An owner, plus tagged family members
- ID number, issue and expiry dates
- Live filename and folder preview

Filter & search instantly

- Filter by member, classification or both
- "Important only" and "Valid only"
- Search names, numbers and tags

Dashboard & alerts

- Upcoming expiries flagged in advance
- Mark critical documents as important
- Widgets you choose for your view

Security & settings

- Optional master password, AES-256
- Custom filename rules from tokens
- Opt-in Google Drive backup

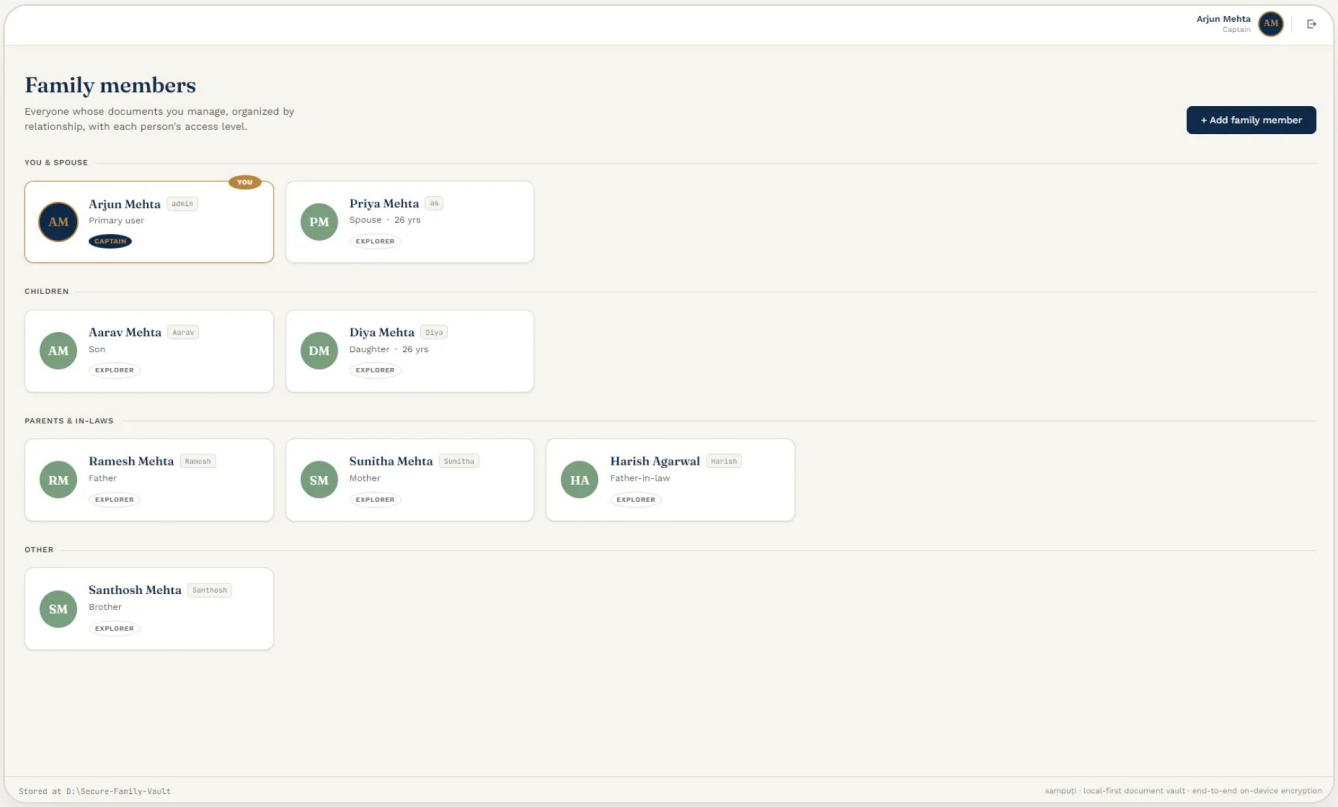
MADE FOR DOCUMENTS LIKE

Passports · Aadhaar & PAN · Driving licences · Educational certificates · Health records · Insurance policies · Investments & tax · Property papers

FAMILY & STRUCTURE

One vault, *every family member.*

Build your family tree once — grouped by relationship, each person with their own sign-in and access level.



CAPTAIN

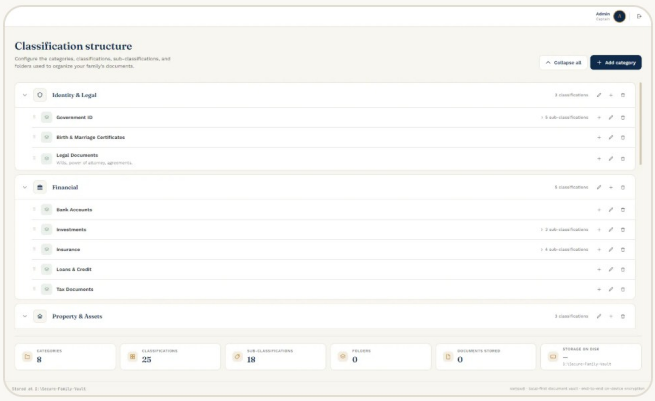
The primary account holder, with full control of the vault.

NAVIGATOR

Can upload, view and delete documents.

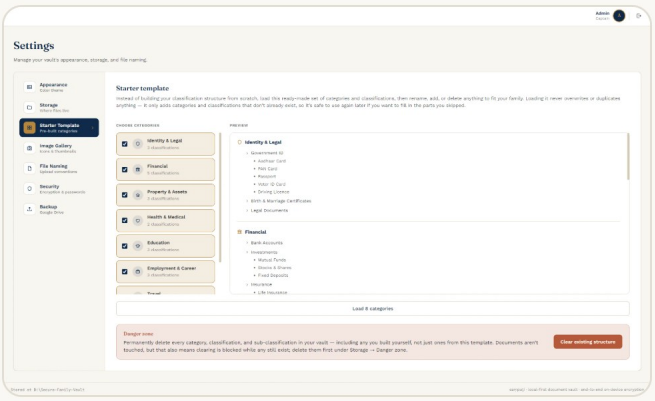
EXPLORER

Can view and download documents only.



Your own hierarchy

Category → Classification → Sub-classification, mirrored as folders on disk.



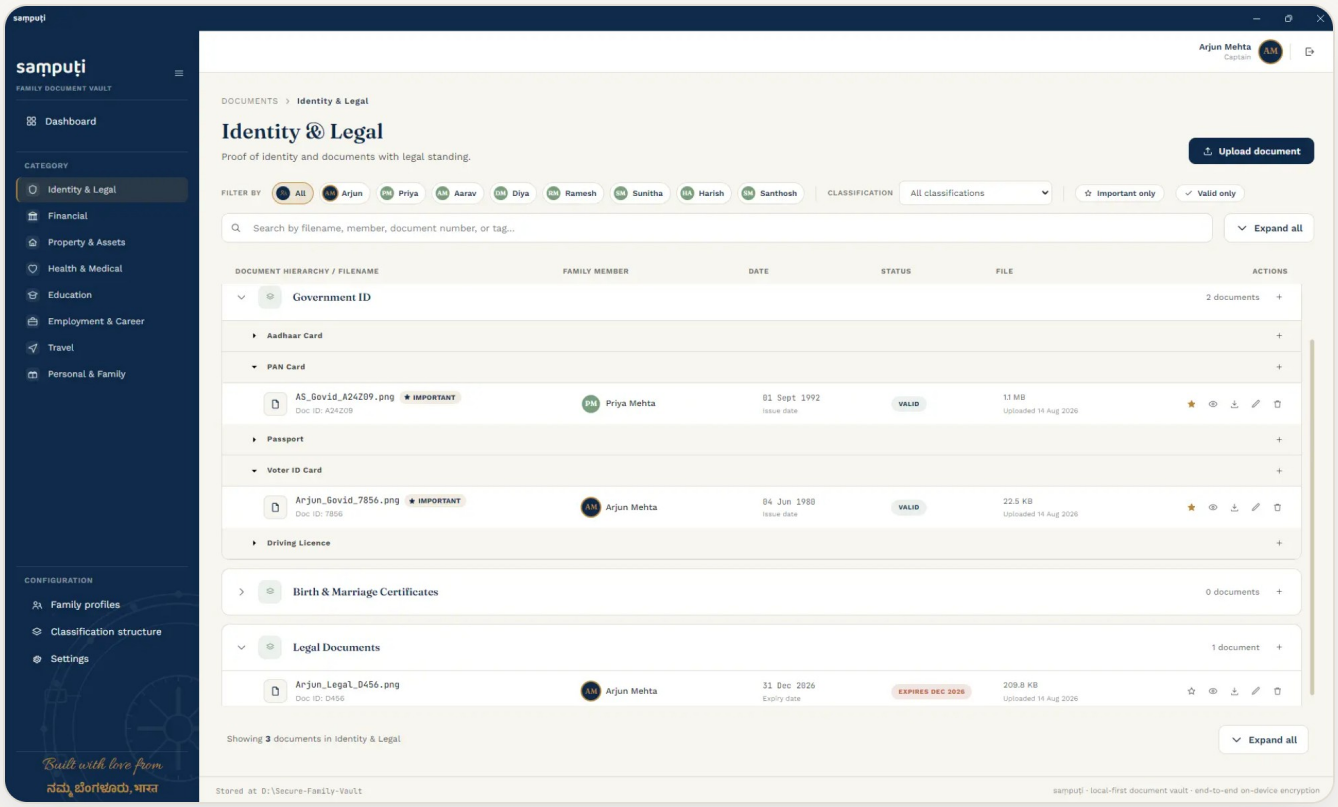
A head start in one click

Eight ready-made categories, from Identity & Legal to Travel. Safe to load again later.

DOCUMENTS

Every document, *fully described.*

Not just a filename — an owner, an ID number, dates and a status, so the right paper is always one search away.



Owner & tags

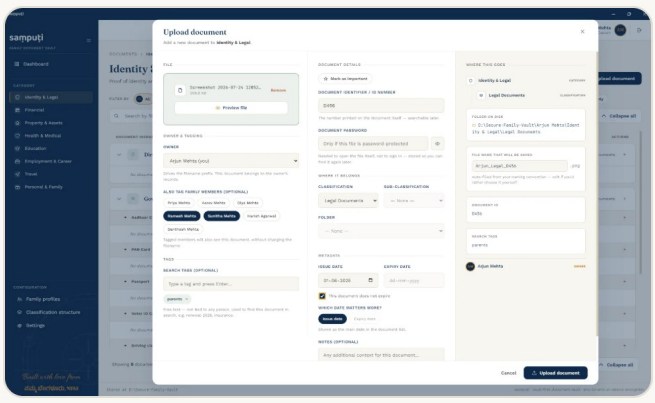
One owner names the file; tag others who should also see it.

ID numbers & dates

Capture the number printed on the document, plus issue and expiry dates.

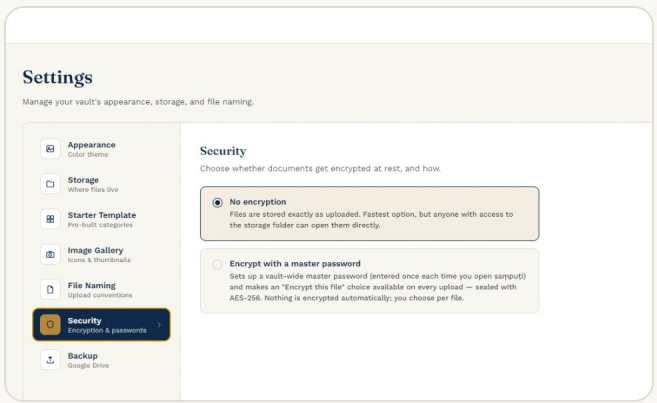
Status at a glance

Valid, expiring soon or important — visible right in the list.



See it before you save it

A live preview shows the exact filename and folder before upload.



Encryption, your call

Add a vault-wide master password and seal chosen files with AES-256.

Set up once, *use for a lifetime.*

No manuals, no complicated setup — four steps and saṃputi gets out of your way.

1

Add your family

Spouse, children, parents, in-laws — build your family tree once.

2

Set up categories

Start with sensible defaults, or organize exactly how you think.

3

Upload & tag

Assign an owner, dates, an ID number and searchable tags as you go.

4

Find anything instantly

Filter by person, category or keyword — one search away.

4.8

★★★★★

Average of early in-app ratings

"The 'needs attention' list caught my father-in-law's passport renewal three months before it lapsed."

Rohan M. · Pune

"Searching is super fast, and sorting by family members makes life so much easier."

Priya S. · Bengaluru

Is anything stored in the cloud?

No. Documents are saved to a folder on your own device. Backup to Google Drive only if you switch it on.

Can the whole family share one vault?

Yes — that's the whole idea. Each member gets their own login and access level.

Start building your family vault *today.*

Free to get started. No credit card, no cloud account, no complicated setup.
